History

Exceda – Remote

UI/UX Design Engineer - November 2014 - July 2015

- Responsible for creating a simplified user experience for the customer portal.
- Create wireframes to demonstrate process flows for a simplistic solution for complex product functionality.
- Create working prototypes to test functionality of wireframes to ensure successful user interactions.
- Review and process customer feedback and suggestions to make updates and enhancements to the portal user interface.
- Collaborate with the marketing team and create collateral needed for their marketing efforts.
- Created a marketing brand and applied those to create data sheets, emails, partner websites, and internal reference guides for the marketing and sales team.

Hard Dollar – Scottsdale, AZ

UI/UX Designer – May 2013 – November 2014

- Responsible for creating a simplified user experience for their next generation SAAS cloud application.
- Creating wireframes using OmniGraffle and assisting in the creation of user stories, scenarios, and acceptance criteria for agile development cycle.
- Working with stakeholders to identify features that are needed for the next generation web application.
- Creating working prototypes and taking those to potential clients for user testing and validation on product functionality.
- Discovering and documenting user personas.
- I am a Cultural Ambassador team member thriving to reach the goal of making the company the premier place to work. We organize activities, make recommendations to management, and promote a positive culture encouraging fellow team members to do the same.

Limelight – Tempe, AZ

Sr. User Experience Engineer – August 2008 – April 2013

- Collaborate with onshore and offshore development teams as well as product management and technical leads to create use cases and product requirements for each feature within our product.
- Participant in an ongoing effort to modernize our web application. Working with customers to gain usability feedback and then transforming those into concepts, requirements, prototypes, and performed testing before releasing a feature.
- Working in short cycles in an Agile environment to: create wireframes using OmniGraffle and bootstrap, documented requirements in Jira using Agile User Story format, create prototypes using HTML5, CSS3, and Bootstrap Responsive UI, and test all features before release.

- Working both remotely and one on one with customers to gain feedback and effectively communicate benefits of new features and provided release notes on all product releases.

Varsity Gold – Gilbert, AZ

Web Designer / Developer – October 2007 – August 2008

- Communicating between marketing and IT departments to create an accurate project scope and timelines.
- Developing weekly HTML email blasts to current online members using best practice standards.
- Designed and implemented a monthly member's only newsletter.
- Created and presented branding ideas for all internal companies that would create a more sophisticated presence in the industry.
- Developed front end user experience for their ASP.NET ecommerce site using HTML and CSS within Visual Studio.

Cology Inc. – Scottsdale, AZ - www.cology.com, www.collegiatesolutions.com, www.tuitionu.com

Sr. Designer – April 2005 – August 2007

- Created a test environment using Apache Server, PHP and MySQL. Setup virtual hosts to allow employees to access specific projects as needed.
- Created all websites from concept to completion, creating all graphics, and presenting ideas to move the project through the approval process.
- Built all websites using HTML, CSS, JavaScript, and server side includes. Created contact and information forms with validation using Regex, PHP, and MySQL.
- Designed and created all corporate web banners with Flash MX 2004.
- Created a corporate identity – logo, letterhead, envelopes, PowerPoint templates and business cards.
- Gained online community experience working with a team to develop the release of a new online education community within stringent deadlines.
- Met all deadlines during creation of websites in a fast paced environment that was constantly changing to reflect the fast growth within the company.
- Led a team of 3 to push the envelope on student lending design for both print and web.
- Received this company's "blue beaker award" in recognition of my outstanding efforts with integrity and results to help make this company a "blue chip" company.

Southwest Student Services Corporation – Gilbert, AZ – www.sssc.com

Web Developer I – May 2001 – April 2005

- Gathered all project requirements from clients to deliver new products to the web in an efficient and effective manner.
- Took initiative to design and present prototypes in multiple formats for all website projects to assist in moving the project forward and meeting deadlines.
- Redesigned corporate website to provide an easier online user experience for their current and potential clients. Redesigning all user interfaces on web applications built with .JSP technology.
- Met aggressive deadlines set to create an internal application that would allow an alternative to access borrower information while systems were down. Creating all interface design within the Struts framework.
